

“Breaking Bad” IBM i Habits!

Best Practices is all about meeting IBM system compliance and achieving optimal results. Don't let old ideas or newly formed bad habits be the difference between a successful IBM Power deployment and a failure in service delivery. This session will exam System configuration, Backups, Disaster Recovery, and Security management.

This session is a compilation of assumptions, technical gaps, blunders, oops, and best practice recommendations. Hear actual lessons learned so you do not make the same IBM i assumptions others have made. Ensure this Hollywood Classic does not portray your IT shop as the names have been changed to protect the guilty.

Richard is Chief Technology Officer of Denovo. He is a recognized SME and world renowned award-winning industry speaker specializing in, Cloud Computing Architecture, Business Resiliency, Disaster Recovery Planning and Backup & Recovery Program Design.
